Relevant Coursework

- Software Engineering
- Real-Time Systems
- Web Development
- Database Management
- Artificial Intelligence
- Internet Technology
- Data Structures
- UI/UX Design

Experience

Global Lancers

Sep 2023 – June 2024

Associate Software Development Engineer

Jaipur, Rajasthan

- Built a project used by **100+ car workshops** with **50,000+ users**, leveraging React.js, Reactstrap, and SCSS for a responsive frontend.
- Improved user engagement by **25%** through real-time Peer-to-Peer interactions and Socket.io integration.

Imonology, Inc

Mar 2023 – May 2023

Software Developer

Taipei

- Utilized React.js with MQTT web socket connections to establish real-time, two-way communication, processing over **50,000 data packets daily**.
- Enhanced user experience with real-time updates, boosting user retention by **15%**.

Appykan, Inc

August 2022 – August 2023

Full Stack Developer

Jaipur, Rajasthan

- Built a Next.js app with **50+ reusable components**, leveraging Tailwind CSS, SCSS, and Figma design principles.
- Enhanced UX with real-time Peer-to-Peer engagement, driving a **40% improvement in collaboration speed**.

Projects

MelodyMatch | Next js, Flask, Amazon Web Services | LINK

March 2025

- **Developed and deployed MelodyMatch**, a real-time audio recognition system using **FFT and peak detection**, enabling fast and accurate song identification.
- **Implemented an optimized fingerprinting algorithm and database structure**, improving search efficiency and supporting scalable song matching.

Thread Cut | Next js, Node js | LINK

November 2022

- Built an e-commerce platform using Next.js and Firebase, enabling **1,000+ custom** orders monthly, with real-time tracking and a UI that improved customer **satisfaction by 30%**.
- Implemented a real-time order status update system, reducing **customer inquiries by 40%**

Salon Port | Flask | LINK

October 2019

- Developed a Flask web app with SCSS styling, MongoDB managing 1,000+ user records, and secure payment integration, reducing transaction time by 20%.
- Integrated role-based authentication, enhancing security for admins and customers.

Technical Skills

Languages: Python, C++, HTML/CSS, JavaScript, Typescript, MongoDB, SQL

Developer Tools: VS Code, Eclipse, Google Cloud Platform, Android Studio

Frameworks/Packages: React js, Next js, Node js, Framer Motion, Tailwind CSS, Formik, Yup Validations, Socket.io, Web RTC, Node js, Express.js, Redis, AWS cloud

Technologies: Linux, Jenkins, GitHub, JUnit, WordPress

Education

University of Alabama at Birmingham

Masters of Science in Computer Science

Birmingham, Alabama

Poornima college of engineering

Bachelor of Technology in Computer Science

City, State

Leadership / Extracurricular

Debug Code

Sep 2020 – Jun 2021

Mentor

Poornima college of engineering

- Achieved a 4-star coding ranking by the codechef platform one of the leading coding testing platforms.
- Managed executive board of 5 members and ran monthly meetings to oversee progress in essential parts of the chapter.
- Led a team of 30+ members to work towards goals that improve and promote competitive coding, academics, and unity.
